

# MOVING-COIL METERS MA16, MB16, MA17, MA17P, MA19, MA19P, MA12, MA12P TYPES AMMETERS and VOLTMETERS

MA16, MB16, MA17, MA19 and MA12 moving-coil meters are intended for measuring d.c. voltage or d.c. current. These meters with built rectifiers can also be used for measuring a.c. voltages and a.c. currents. MA17P, MA19P, MA12P meters with built-in rectifiers are used for measurement of the rectified current or voltage arithmetical mean value and they are such calibrated that they indicate the RMS value at sinusoidal curve shape. The measurement of non-sinusoidal a.c. magnitudes results in additional errors.

MA16, MA17, MA17P, MA19, MA19P, MA12 and MA12P meters are designed for mounting into panels. MB16 meters are adapted for a fast assembly rail mounting (35 mm rail) in compliance with EN 60715 standard MA16, MA17 and MA19 meters are designed for interchangeable dials.

# **TECHNICAL DATA**

| Accuracy class   | 1.5  |
|--|--|
| Internal resistance,<br>voltage drop, current<br>or power consumption                                | acc. tables 1, 2 and 3   |
| Adaptation of the meter<br>measuring range to the<br>range of interchangeable<br>shunts or measuring |  |
| transducers  | by changing of the dial: the dial is<br>simply extracted with a suitable tool<br>and replaced through the upper<br>slot of the case<br><b>Note:</b> MA12 (144 x 144) meters<br>are not provided for interchangeable<br>dials |

#### CATEGORIES OF METER CLIMATIC VERSIONS

If it is not written otherwise in the order, these meters are intended to use in moderate climatic conditions. Then, we do not place any symbol on the scale. On customers' request, meters can be adapted to use in conditions of a dry or wet tropical climat. Then, they are marked with the T III symbol.

# Requirements concerning safety acc. EN 61010-1 standard:

For MA16 and MB16 meters and meters with rectifiers:

| - maximal phase-earth   |       |
|-------------------------|-------|
| working voltage         | 600 V |
| - installation category | III   |
| - pollution degree      | 2     |
|                         |       |

For MA17, MA19 and MA12 meters:

| - maximal phase-earth                     |       |
|---|-------|
| working voltage                           | 600 V |
| <ul> <li>installation category</li> </ul> | 111   |
| - pollution degree                        | 2     |

Protection Grade acc. to EN 60529

- in standard option:
  - IP 50 for MA16, MA17, MA17P, MA19, MA19P, MA12, MA12P meters

alass

- IP 54 (only for MA12 and MA12P meters)
- IP 52 (only for MB16 meter)
- with IP 65 front protection grade (on request):
- for MA16, MA17, MA17P, MA19, MA19P meters
- IP 20 terminal protection (with a terminal protective cover)

### Case material

Meter glass material

Additional setting pointer

On customers' request MA17 and MA19 meters can be equiped with an additional, setting red pointer fixed on the glass.

thermoplastic material

#### ACCESSORIES

We deliver with the meter:

- screw holders (for standard options)...... 2 pcs
- screw holders (for IP65 option) ...... 4 pcs
- terminal protection cover ..... 1 pc
- spring holders (only for MA16) ..... 2 pcs

Note: MB16 meters do not have terminal protective cover.

We can also deliver on request, interchangeable shunts of B2, B3, B4, B5 and B5 types.

# DC CURRENT AND DC VOLTAGE RANGES, INTERNAL RESISTANCE OR VOLTAGE DROP

# METER EXTERNAL DIMENSIONS

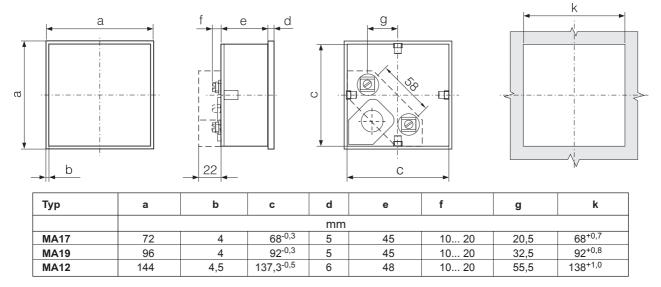

Fig. 2. External dimensions of MA17, MA19 and MA12 meters

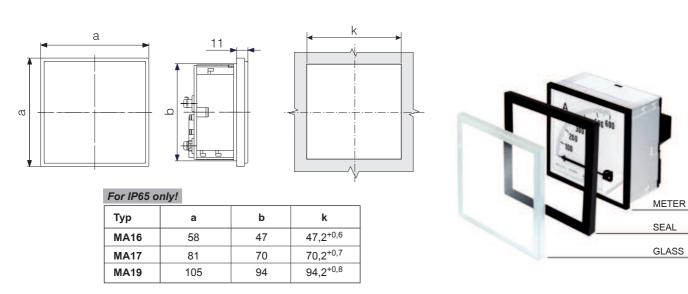

Fig. 3. External dimensions of meters with IP 65 protection grade

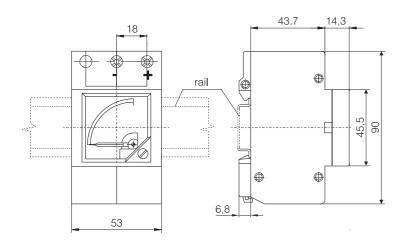

Fig. 4. External dimensions of MB16 meters

# **FASTENING ON PANELS**

#### MA16 meters

The meters are adapted to be mounted from the front of panels and then they are equiped with two spring holders, which can be fixed on arbitrary opposite case sides (Fig. 1b) or to be mounted from the rear of panels and then they are equiped with two screw holders which can be fixed on arbitrary, opposite case corners (Fig. 1a).

#### MA17, MA19 and MA12 meters

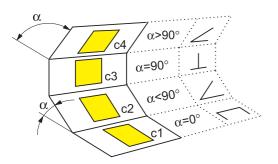

In their basic execution these meters are adapted to be mounted from the rear of panels by means of two screw holders which can be fixed on arbitrary opposite case corners (Fig. 5).

## Execution of meters with IP 65

The meter is fixed in the panel by means of 4 screw holders.

After agreeing with the manufacturer, MA17 and MA19 meters can be delivered with a snap fastened frontal frame and then these meters can be mounted from the front of panels by means of two spring holders fixed on arbitrary opposite case sides.

# CODING OF THE WORKING POSITION

| Table 4 |  | Table | 4 |
|---------|--|-------|---|
|---------|--|-------|---|

| Code | Working position |
|------|------------------|
| 0    | c3, α = 90°      |
| Α    | c1, α = 0°       |
| В    | c2, α = 15°      |
| С    | c2, α = 30°      |
| D    | c2, α = 45°      |
| E    | c2, α = 60°      |
| F    | c2, α = 75°      |
| Н    | c4, α = 105°     |
| I    | c4, α = 120°     |

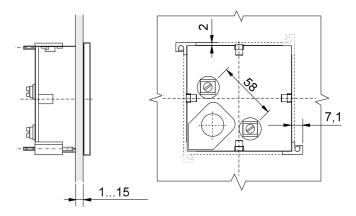

Fig. 5. Fixing of meters in the panel

# **ORDERING PROCEDURE**

In the order one must specify: name and type of meter, measuring range, shunt data if the meter is foressen to co-operate with an interchangeable shunt, working position, kind of climat (only for tropical versions), kind of holders and eventual additional requirements. One must order interchangeable shunts or D2 series resistors. When ordering meters for measuring a.c. current or a.c. voltage, one must add to the meter name "rectifier" - (rectifier meter)

# Example of order:

MA16 ammeter, 40 A, c2 30, TIII, screw holders, 0...40 A range IP54, B2/60 mV- 40 A shunt, IP65.

MA16 – moving-coil meter (48 x 48 mm),

**40 A** – 40 A range,

**c2 30** – working position 30° with relation to horizontal position (table 4),

TIII – design and materials adapted to specific tropical klimat, Screw holders – type of holders (screw or spring-holders),

**0...40 A** – measuring range on the dial,

**B2/60 mV/ 40 A** – to co-operate with a 40 A shunt of B2 type **IP 54** – protection grade of the casting front
