

## Power analyzer for panel with power quality measurement parameters

#### **Description**

**CVM-A1500** is a panel mounted power quality analyzer with EMS (Energy Management Software) integrated. Its internal Web Server (html5) allows any user to have full installation control by using any web browser.

Designed to be installed in the most relevant or critical part of electric installations since it registers and monitors a wide range of variables (almost one year of data with RMS, maximum and minimum values). The device also registers power quality events such as swells, dips, interruptions (every half cycle) and transients (according to **IEC 61000-4-30** Class A). Any event will be immediately captured with the voltage and current waveform.

This model adds the measurement of power quality variables (defined in the standard **EN 50160**) such as flicker, unbalance (Kd) and asymmetry (Ka) coefficients or voltage and current harmonics decomposition up to 63th. In addition it is possible to monitor in real time the instantaneous waveforms of voltage and current through its oscilloscope function.

As an added value, **CVM-A1500** displays the number of events and transients on each affected phase with the level reached, duration and its associated waveform. In addition, those events are directly displayed in CBEMA, ITIC y SEMI-F47 graphs.

The smart design of the **CVM-A1500** allows users to customize their own screens in order to access to the information faster and easy. Remark that the device allows the connection though PowerStudio software to save and store, in a redundant way, all the information in a server or PC avoiding memory limits.

- Dimensions:144 x 144 mm
- Energy Management Software (EMS) included with historical data register
- Register of power quality events, waveforms and instantaneous parameters.
- Expandable up to 3 modules (inputs/outputs and communications)
- VGA color display with high definition
- IP 65 with airtight seal
- 5 voltage channels + 4 ITF current channels
- Active energy class 0,2S (IEC 62053-22)
- Universal switching power supply AC/DC or DC
- Ethernet communications (Web Server) + RS-485 (ModBus RTU or BACnet protocol)
- 5 user customizable screens
- 3 tariffs (selectable by digital input or by communications)
- Cost calculation(any currency) and emissions of  $\ensuremath{\mathsf{kgCO}}_{\!_2}$
- 2 relay outputs for alarms + 2 transistor outputs for alarms or pulses + 2 digital inputs to select tariff, to control logical states or pulse centralizer from any external meter.

CIRCUTOR

## Power analyzers for panel with power quality measurement parameters

#### **Applications**

- Control, monitoring and logging of the power quality in High and Low Voltage distribution panels. Performed directly or remotely thanks to its WEB server. Integration in SCADA systems through XML requests.
- 4 alarms (2 per transistor and 2 per relay), fully and independently programmable according to a low or high value, hysteresis, connection/disconnection delays, normally open or closed standby status and interlocking.
- Generation of impulses with transistor outputs, fully and independently configurable over any incremental parameter (energy, costs, kgCO<sub>2</sub>, total meter or tariff hours).
- Transducer converting analogue signals to any instantaneous parameter measured or calculated by the unit, with built-in expansion modules with analogue outputs.
- Display of process signals featuring a built-in expansion module with analogue inputs, with optional reporting of these signals to SCADA systems through communications systems.
- Control of electrical load or alarm signal operations by programming the transistor or relay outputs that are built-in or added through expansion modules.
- Datalogger integrated with Web server and XML (log of historical data).

#### **Technical features**

Power supply voltage	85265 Vac / 120300 Vdc 20120 Vdc (SDC model)			
AC frequency	4565 Hz			
AC consumption				
20 concampuon	max 13,8 W (SDC model)			
Voltage range	500 V <sub>p-n</sub> - 866 V <sub>p-p</sub> (functional up to 600 V <sub>p-n</sub> / 1000 V <sub>p-p</sub> )			
Frequency	4070 Hz			
Measurement margin	7200% of the $U_n$ for $U_n = 300$ Vac. (p-n)			
Admissible overvoltage	750 Vac			
Maximum power consumption (limited current)	< 0.15 VA			
Current measurement	4 (3 phases + 1 neutral)			
Input current	/5 A or/1 A or/250 mA			
Minimum current for class	250 mA			
Start-up current	10 mA			
Measurement margin	0.2200% / <sub>n</sub> (/5 A)			
		,		
	4200% I <sub>n</sub> (/250 mA)			
Admissible overload	2 I <sub>n</sub> A permanent, 100 A t < 1 s			
		III, 100 A L < 1 S		
Consumption	< 0.9 VA	III, 100 A t < 1 S		
	< 0.9 VA		A in <b>MC</b>	
Consumption Primary V: 500,000 (500 kV) Primary A: 999.9 to 1.0 (10 kA	< 0.9 VA o) in/5 A and		A in <b>MC</b>

## Power analyzers for panel with power quality measurement parameters

#### **Technical features**

Connections				
Digital inputs	Selection of tariffs, states or external alarms			
	Туре	Optoisolated potential-free contact		
	Quantity	2		
	Activation current	5 mA (15 V maximum voltage of open contact)		
	Insulation	4 kV		
Digital outputs	Generation of impulses or alarms			
	Туре	NPN transistor		
	Quantity	2		
	Maximum operation voltage	48 Vdc		
	Maximum switching current	130 mA		
	Maximum frequency	1 kHz		
	Pulse duration (T <sub>on</sub> / T <sub>off</sub> )	0.3 / 0.7 ms (1 ms of a complete impulse)		
	Alarms			
	Туре	Relay		
	Quantity	2		
	Maximum operating power	1500 W		
	Maximum voltage, open contacts	250 Vac		
	Maximum switching current	6 A		
	Electrical working life (400 V / 6 A)	3 x 10 <sup>4</sup> cycles		
	Mechanical working life	1 x 107 cycles		
Built-in communications	Protocols	Modbus RTU / BACnet		
	Speed	9600115200		
	bits, parity, stop	8, n, 1 (configurable)		
Environmental	Working temperature	-10+50°C		
conditions	Relative humidity	595%		
	Altitude	2000 m		
Build features	Format	Assembly on 144x144 mm panel		
	Depth	1 module		
	Front panel IP protection	IP 40 (IP 65 with sealing gasket)		
	Rear panel IP protection	IP 30		
Safety	Designed for CAT III 300/520 Va.c. installations, in accordance with <b>EN 61010</b> Double-insulated electric shock protection, class II			
Standards	IEC 62053-22, ANSI (class 0.2S), IEC 62053-24 (Class 1) / ANSI C12.1 (Class 2), class A acc. to IEC 61000-4-30, IEC 61010, IEC 61000, UNE-EN 55022 Measurement acc. to MID, UL certification IEC 61000-4-2, IEC 61000-4-3, IEC 61000-4-11, IEC 61000-4-4, IEC 61000-4-5
